

KB168625259: Color Engine Pilot - How can I change the Opacity of a Metallic Ink

Description

How can I change the Opacity of a Metallic Ink?

Procedure

By default, Metallic Inks are opaque. If you need to change the Opacity of a Metallic Ink please do the following:

1. Copy your Metallic Ink to the Designer Book.

 The Metallic Ink must be a profiled ink!

2. Then **Edit** the ink and change the **Opacity**.
3. You then have to make sure that you use the new ink from the Designer Book.
