

KB115934127: Automation Engine - IMP versus Imposition tickets

Question

In the Automation Engine Tasks list, there are tasks containing the word `IMP` and other tasks with the word `Imposition`. Which one do I need to use?

Answer

Choose an `IMP`-task in case you work with an `IMP`-file. An `IMP`-file can be created by using either the FastImpose application or `IMP`-file tasks such as **Import JDF Stripping** or **Create IMP File**.

If you are not working with an `IMP`-file, choose a task with the word `Imposition`. This refers to all third party impositions.

There is one exception: When publishing an `IMP`-file on WebCenter, there is only one task **Publish Imposition on WebCenter Chain**.
