

# KB82228026: Nexus - Error "Undefined - Failed to load CSB title header" appears

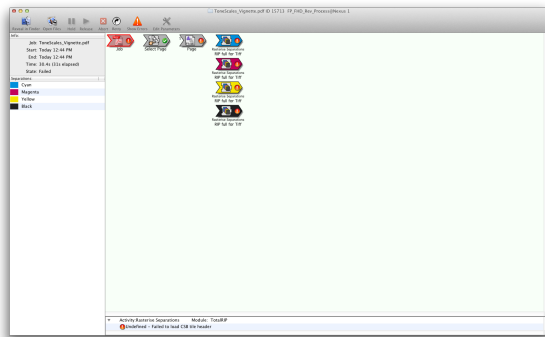

## Summary

When using HD Flexo Screens within Nexus, the following error appears in the **Rasterise Separations** module:

"Undefined - Failed to load CSB title header".

## Symptoms

The error "**Undefined - Failed to load CSB title header**" appears in the **Rasterise Separations** module.

- [Workaround](#)

## Solution

1. Quit Control.
2. Try making a new shortcut to the `bg_data_screen_v010` folder and rename it `Esko Screening` and place within Nexus Version Folder. Or if there is already an existing `Esko screening` folder, copy the contents of the `bg_data_screens` into the existing folder.
3. Start Control.

## Workaround

If this still does not work, regenerate the HD Flexo Screens and redo the previous steps.
