

# KB150078215: Hotfix 1205052 for Automation Engine 12.2.0

## Summary

In the Shuttle or in the Pilot (when in **Shuttle** mode and typically via **Launch Favorites**), opening a workflow's (or a task's) public parameter panel may take quite some time.

## Symptoms

In the Shuttle or in the Pilot (when in **Shuttle** mode (**Edit > Preferences > Tickets > Show only Public Parameters in Tickets**) and typically via **Launch Favorites**), opening a workflow's (or a task's) public parameter panel may take quite some time.

This is a side effect of checking the task history for picking up previously used public parameters. The option to control this behavior (**Tools > Configure > Shuttle > Use the task history to re-launch tasks using the same public parameters**) is wrongly not taken into account.

### What is a Hotfix?

A Hotfix is a software package that you can install on an existing installation of our software. Each hotfix contains fixes for one or more known issues in our released software.

Because there is always a small chance for a hotfix to cause new issues, you should only install Recommended Hotfixes, unless otherwise instructed by your Esko Software Support team.
