

KB190850281: Hotfix 201704003 for Automation Engine, PackEdge, Plato 16.0.2

Summary

Added support to use SmartNames when building ink attribute queries for SmartMarks in PackEdge /Plato.

Symptoms

Main use case of this new functionality is to be able to select ink from job parameter SmartName (e.g.: use job related SmartName in custom ink\attributes).

What is a Hotfix?

A Hotfix is a software package that you can install on an existing installation of our software. Each hotfix contains fixes for one or more known issues in our released software.

Because there is always a small chance for a hotfix to cause new issues, you should only install Recommended Hotfixes, unless otherwise instructed by your Esko Software Support team.
