

KB237813771: Hotfix 201806055 for WebCenter 18.0.1

Summary

This hotfix solves the following two issues:

- Document references are not saved during Project Creation when Attribute Category is collapsed.
- Attribute Category jumps back to top when repainted.

Symptoms

- After Project Creation, documents uploaded as document references of another document are not saved in the newly created project.
- Attribute Category jumps back to top when repainted.

What is a Hotfix?

A Hotfix is a software package that you can install on an existing installation of our software. Each hotfix contains fixes for one or more known issues in our released software.

Because there is always a small chance for a hotfix to cause new issues, you should only install Recommended Hotfixes, unless otherwise instructed by your Esko Software Support team.
