

KB289716402: HOTFIX 201911088 for WebCenter 18.1.1

Summary

Document references duplicating in task forms.

Symptoms

- A user completes a task and there are two files in Document reference attribute. The next task is created. When opened, there are four files in the Document reference. The original two files have been duplicated.
- When some operation triggers both attribute category copies at once. it might then result in duplication of document rows or disappearing attribute values.

What is a Hotfix?

A Hotfix is a software package that you can install on an existing installation of our software. Each hotfix contains fixes for one or more known issues in our released software.

Because there is always a small chance for a hotfix to cause new issues, you should only install Recommended Hotfixes, unless otherwise instructed by your Esko Software Support team.
